PRO-082 · Create an expert workflow for No-Code Automation

Use this when you need to create an expert workflow for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to create an expert workflow for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-083 · Design a reusable template for No-Code Automation

Use this when you need to design a reusable template for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to design a reusable template for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-084 · Analyze performance gaps for No-Code Automation

Use this when you need to analyze performance gaps for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to analyze performance gaps for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]

- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-086 · Produce a quality-assurance checklist for No-Code Automation

Use this when you need to produce a quality-assurance checklist for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to produce a quality-assurance checklist for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-087 · Develop a multi-step prompt chain for No-Code Automation

Use this when you need to develop a multi-step prompt chain for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to develop a multi-step prompt chain for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-088 · Create a stakeholder-ready report for No-Code Automation

Use this when you need to create a stakeholder-ready report for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to create a stakeholder-ready report for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for no-code automation.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-089 · Compare options and recommend one for No-Code Automation

Use this when you need to compare options and recommend one for no-code automation within no-code automation.

Act as a senior no-code automation specialist. Your task is to compare options and recommend one for no-code automation for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]

5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.
```

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-109 · Compare options and recommend one for Data & Reporting

Use this when you need to compare options and recommend one for data & reporting within data & reporting.

```
Act as a senior data & reporting specialist. Your task is to compare options and recommend one for data & reporting for my professional context.

BUSINESS CONTEXT
- Organization/brand: [NAME]
- Industry: [INDUSTRY]
- Objective: [MEASURABLE OBJECTIVE]
- Target audience: [AUDIENCE]
- Current situation: [CONTEXT]
- Available inputs/data: [INPUTS]
- Constraints: [BUDGET, TIME, TOOLS, POLICY]

METHOD
1. Identify missing assumptions and ask essential clarification questions.
2. Break the work into a logical multi-step process.
3. Apply professional best practices for data & reporting.
4. Provide two viable approaches and explain the trade-offs.
5. Recommend the strongest approach with reasons.
6. Add quality checks, risks, and verification steps.

DELIVERABLE
Return: executive summary; detailed output; implementation steps; owners; timeline; KPIs; risks; and a reusable follow-up prompt.
```

Refine: Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

PRO-110 · Build a 30-day action plan for Data & Reporting

Use this when you need to build a 30-day action plan for data & reporting within data & reporting.

Act as a senior data & reporting specialist. Your task is to build a 30-day action plan for data & reporting for my professional context.

BUSINESS CONTEXT
