# Starter — 50 Prompt Library

Practical, non-coding prompts. Replace all [BRACKETED VARIABLES], verify important claims, and never paste confidential information into public AI tools.

## Learning & Study

**STA-001 · Explain a difficult concept**

Use this when you need to explain a difficult concept within learning & study.

```
Act as a patient, practical AI learning assistant. Help me explain a difficult concept.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to learning & study.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-002 · Create a study plan**

Use this when you need to create a study plan within learning & study.

```
Act as a patient, practical AI learning assistant. Help me create a study plan.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to learning & study.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-003 · Build revision questions**

Use this when you need to build revision questions within learning & study.

```
Act as a patient, practical AI learning assistant. Help me build revision questions.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to learning & study.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-004 · Compare two ideas**

Use this when you need to compare two ideas within learning & study.

```
Act as a patient, practical AI learning assistant. Help me compare two ideas.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to learning & study.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-005 · Turn notes into flashcards**

Use this when you need to turn notes into flashcards within learning & study.

```
Act as a patient, practical AI learning assistant. Help me turn notes into flashcards.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to learning & study.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

# Research

**STA-006 · Plan beginner research**

Use this when you need to plan beginner research within research.

```
Act as a patient, practical AI learning assistant. Help me plan beginner research.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to research.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-007 · Summarize a source**

Use this when you need to summarize a source within research.

```
Act as a patient, practical AI learning assistant. Help me summarize a source.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to research.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-008 · Create research questions**

Use this when you need to create research questions within research.

```
Act as a patient, practical AI learning assistant. Help me create research questions.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to research.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-009 · Check claim quality**

Use this when you need to check claim quality within research.

```
Act as a patient, practical AI learning assistant. Help me check claim quality.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to research.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-010 · Organize findings**

Use this when you need to organize findings within research.

```
Act as a patient, practical AI learning assistant. Help me organize findings.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to research.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

# Writing

**STA-011 · Draft an essay outline**

Use this when you need to draft an essay outline within writing.

```
Act as a patient, practical AI learning assistant. Help me draft an essay outline.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to writing.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-012 · Improve a paragraph**

Use this when you need to improve a paragraph within writing.

```
Act as a patient, practical AI learning assistant. Help me improve a paragraph.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to writing.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-013 · Rewrite for clarity**

Use this when you need to rewrite for clarity within writing.

```
Act as a patient, practical AI learning assistant. Help me rewrite for clarity.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to writing.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-014 · Generate headline options**

Use this when you need to generate headline options within writing.

```
Act as a patient, practical AI learning assistant. Help me generate headline options.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
- Audience: [WHO WILL USE THE RESULT]

INSTRUCTIONS
1. Ask up to three short clarifying questions if important information is missing.
2. Explain the task in plain language without unnecessary jargon.
3. Produce a clear step-by-step response relevant to writing.
4. Include one practical example.
5. Highlight anything I should verify independently.

OUTPUT
Use short headings, bullet points, and a final “Next Action” section.
```

**Refine:** Review the output as a critical expert. Identify weak assumptions, unsupported claims, missing evidence, and impractical recommendations. Then produce a stronger second version.

**STA-015 · Proofread a document**

Use this when you need to proofread a document within writing.

```
Act as a patient, practical AI learning assistant. Help me proofread a document.

CONTEXT
- My situation: [DESCRIBE THE SITUATION]
- My current knowledge: [BEGINNER / SOME EXPERIENCE]
- My goal: [DESIRED RESULT]
